Mobility for SAP Inspection & Service

ISEC7® Mobility for SAP Inspection & Service

ISEC7 Mobility for SAP enables mobile access to service orders and notifications for service technicians. Confirmation of material, time and status can be done offline and gets updated directly in the ERP system when a network connection is available. This replaces costly and error-prone paper based processes. Additionally the efficiency of service processes is increased by the overview of all relevant data and the history of all service orders for an equipment.

Mobility for SAP Inspection & Service is a powerful but lean software solution, where customer specific enhancements are simply done with existing ABAP know-how.

Features

- Offline available inbox of all assigned service orders
- Offline confirmation of time, material and status
- Data transfer during the next online connection
- Documentation of damages and repairs via photo and GPS coordinates
- Handling of checklists

Highlights

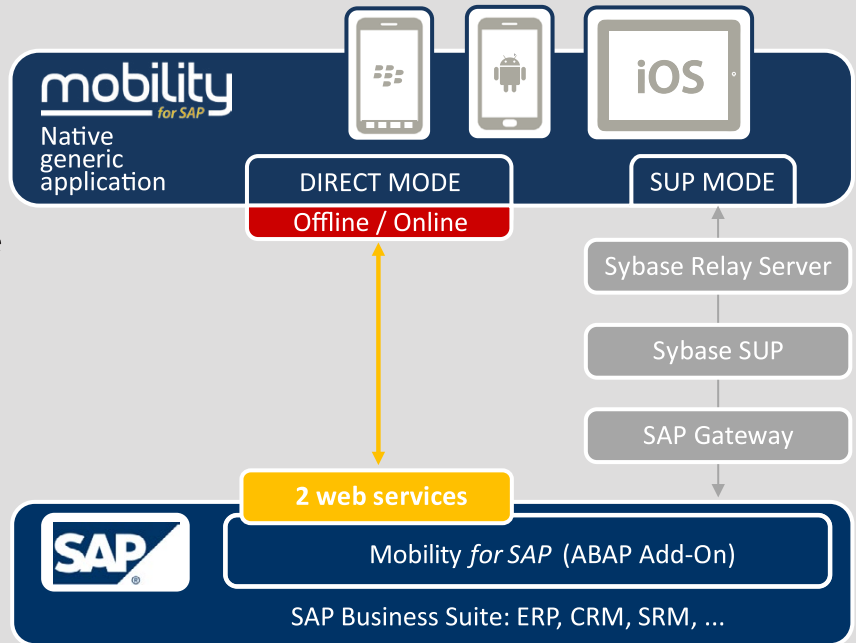

- Enhancement concept for individual fields and further data from every SAP system
- Offline confirmation and online access, i.e. material reservation
- Creating and editing data offline
- No middleware required: Direct connection in online and offline mode from mobile device to SAP backend
- Application enhancement with ABAP coding in the backend – no mobile client development required
- Optional connection via GOOD® Dynamics
- Optional connection via Sybase SUP (migration path)
- Integration of GPS and maps, camera, barcode, RFID and NFC
- Works with single sign-on and X.509 certificates
- Native generic application with smart design and high usability
- Easy adoption to customer specific colors and logos

SAP® Certified
Integration via Enterprise Services
