ISEC7® Mobility for SAP Workflow

ISEC7 Mobility for SAP enables mobile approval of various SAP® Workflows via smartphone and tablet. Users access their assigned workflows from different backend systems. All information needed for the decision are shown, so the approval or rejection can be done anytime anywhere. This speeds up workflow processes.

Mobility for SAP Workflow is a powerful but lean software solution, where customer specific enhancements are simply done with existing ABAP know-how.

Features

Access to SAP Workflows from various SAP backend systems, like:

- SRM shopping carts
- ERP/CRM quotations
- HR travel expenses and leave requests
- And many others

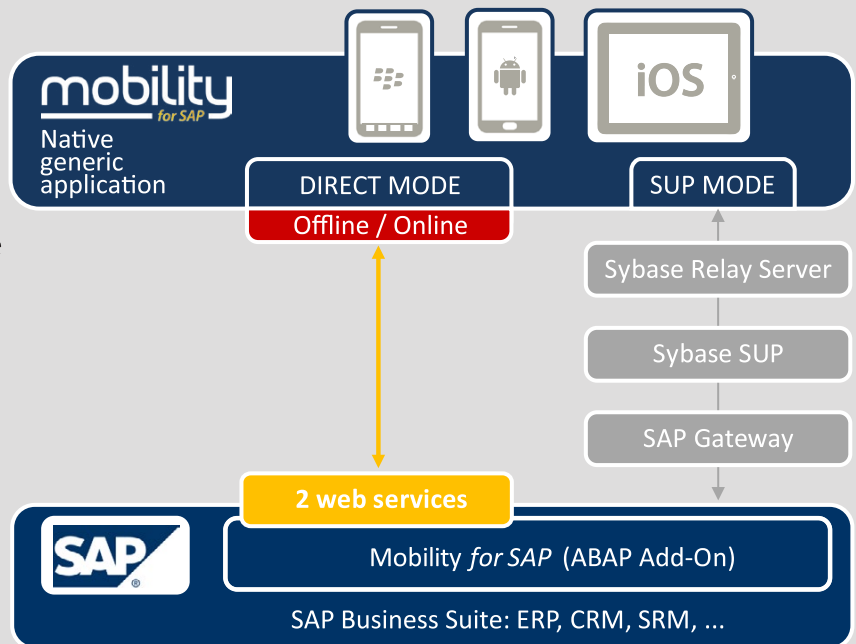

Highlights

- Enhance the application with ABAP coding in the backend – no mobile client development required
- Workflow inbox with workflows from different systems
- Integration of attachments
- No middleware required: Direct connection in online and offline mode from mobile device to SAP backend
- Application enhancement with ABAP coding in the backend – no mobile client development required
- Optional connection via GOOD® Dynamics
- Optional connection via Sybase SUP (migration path)
- Integration of GPS and maps, camera, barcode, RFID and NFC
- Works with single sign-on and X.509 certificates
- Native generic application with smart design and high usability
- Easy adoption of customer specific colors and logos

Benefit

- Value for business units
 - › A mobile solution tailored to individual needs
 - › Adaptable to backend enhancements
 - › Shortens processes and provides mobile access to SAP data
 - › Budget friendly – low TCO
- Value for IT
 - › Mobile solution without additional investment in hardware and skills
 - › Few own resources needed
 - › Installation in a few hours
 - › Leading to a low TCO
- Value for developers
 - › Mobilizing processes with existing ABAP skills
 - › Development in daily used ABAP environment after one day of training
 - › No skills needed for mobile app development on different operating systems
